Little Bash Street Books

A brief introduction to making and using little books.

Little Books are irresistible – both to read and to write.

The books can be printed on A4 or A3. They require very careful cutting and folding to make a tidy book. Different photocopiers shrink images in different ways so you may need to trim the edges to get an accurate sheet that will fold neatly. If you print a different book on two sides you can magically change your book by turning it inside out!

How Little Books are Made.

You may find the template below helpful in making your own little books. Children like making their own for sharing with others; writing the text and adding illustrations. Remember that it is vital to fold and cut precisely.
