

Flesh hook

1200-800 BCE
Late Bronze Age

Razor

800-400 BCE
Early Iron Age

Part of a wheel

400 - 200 BCE
Middle Iron Age

Mirror

150 BCE-50 CE
Late Iron Age

Nail

100 BCE - 100 CE
Late Iron Age to Roman

Late Iron Age
Blacksmith's tools e.g. sledgehammer, tongs

100 BCE - 100 CE
Late Iron Age to Roman

Well misc. changed differently. Such as the chopper, they were made into arrowheads.

Tuesday 2nd November

LO: To consider and discuss what Stone Henge was used for. 😊 ★  Stone Henge  ★

I think Stone Age was used ~~for~~ as a cemetery because first of all, promising evidence of cremated bodies has been found. Second of all, more evidence of barrow burials (in bodies buried alone, not in groups) has also been uncovered. These are often associated with Beaker People (Bronze Age citizens) people).

However, I strongly disagree with the theory ~~that~~ ^{agreed} by many, which is Stone Henge being used for music festivals. I think there is not enough strong, believable evidence to prove this point. Plus, Stone people may have not even played music.

😊  Stone Henge Facts  😊

- ★ It is estimated that the three phases of construction could've taken more than thirty million hours of labour.
- ★ To make the stones fit together well, they carved burr and holes to make them fit together, a bit like L
