

What's That Sound?

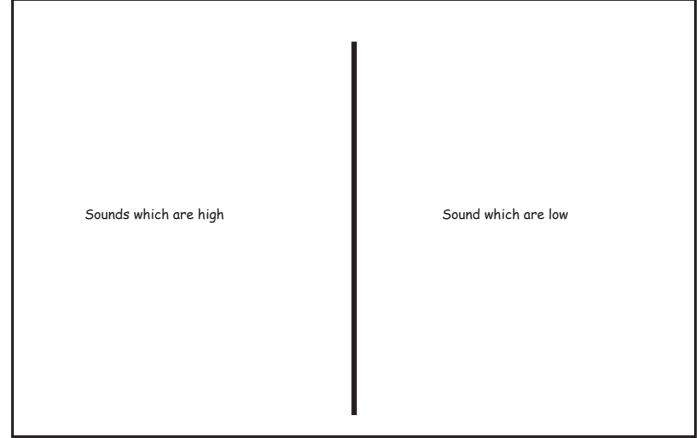

Quicklook

An activity to help students distinguish between pitch and loudness, high and low pitched sounds, involving first sorting sounds into high and low categories and then into high/loud, low/loud etc.

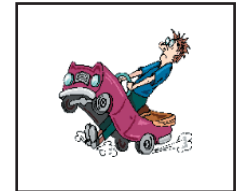

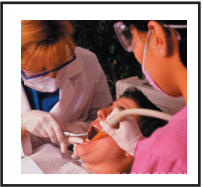

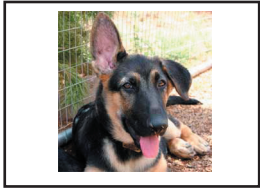

We were driving along when the dog in the back of the car started whining.

To download full activity go to:

I could just hear the mouse squeaking from the far end of the hall.

I could hear the dentist's drill while I was in the waiting room even though the door was shut.

The jet plane zoomed very low over our house.
